

I respectfully urge the FCC to reject the National Association of Broadcaster petition 04-160 to limit the choice of satellite radio stations I can listen to. I pay a monthly subscription fee for these services and I should have the benefit of the widest range of stations. To arbitrarily limit my choice so that NAB members can force me to listen to their stations is not the in the sprit of free competition.

Let them improve their programming so I want to listen to their stations!
